

A close-up of a woman's face with long, light-colored hair. A vibrant, multi-colored powder explosion, resembling a rainbow, is centered over her mouth. The colors transition from green at the top, through yellow, orange, red, pink, and purple, to blue on the right side. The woman's eyes are visible above the explosion, looking directly at the camera.

5 cm = 2.5 gr
6 cm = 3.0 gr
7 cm = 3.5 gr
8 cm = 4.0 gr
9 cm = 4.5 gr

Karışım Önerileri

- Morfose 10 Mixs renkleri yoğun direkt renklendiricilerdir (derinliksiz). Bazı olarak kullanılan ton ne kadar açıkse Mixs Renk o kadar az kullanılır. 12 bu kurala uymaz.
- Saç tellerini veya saçın bir bölümünü yoğunlaştırmak için Morfose 10 Oksidan Krem ile 1:1 oranında kullanılır.
- Olaganüstü parlaklık elde etmek için önceden açılmış saça uygulayınız.

Karışım Oranı

Genel olarak Morfose 10 Mixs Renkler ana renklerle birlikte çok az miktarda kullanılır.

1 Morfose 10 ana renk + Morfose 10 Mixs Renk + 1 Morfose 10 Oksidan Krem
Örnek: 2 gr (4 cm) Mixs Renk + 30 gr Morfose 10 + 32 gr Morfose 10 Oksidan Krem

Bekleme süresi tamamlandığında bir miktar ılık suyla saça masaj yapınız, durulayarak Morfose 10 Renk Sabitlestiren Şampuan ile saçı yıkayınız.

Mixing Recommendations

- Morfose 10 Mix Colors are intense pure colorants (without depth). The lighter the tone used as the base, the less the Mix Color is used. [Exception: 12]
- To intensify strands or sections of hair, Morfose 10 Mix can be used purely with Morfose 10 Oxydant Cream in a 1:1 ratio.
- For exceptional, brilliant color results, apply to pre-lightened hair.

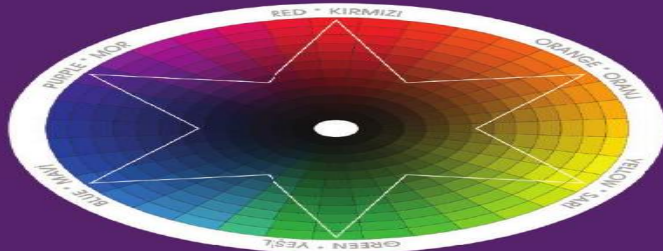

Mixing Ratio

In general, Morfose 10 Mix shades are used in modest amounts when mixed with Morfose 10 shades.

1 part Morfose 10 + Morfose 10 Mix + 1 part Morfose 10 Oxydant Cream,
2 gr (4 cm) Mix Color + 30 gr Morfose 10 + 32 gr Morfose 10 Oxydant Cream.

When the development time is complete, add a little warm water and gently emulsify. Rinse thoroughly and use Morfose 10 Color Lock Shampoo.
